

The Marriage and Family Therapists Section previously asked for information regarding the pass rates of the AMFTRB national exam in relation to the educating institution of the exam candidate. These statistics are not available through the AMFTRB organization and so we compiled the list using department resources by looking at the applications of each individual candidate. These numbers reflect all exam candidates from the December, 2014, exam window to present day.

**There were 55 total exams taken. This includes first time test takers and repeat takers. 30 of the 55 exam scores were passing scores for a 54.5% pass rate.**
